Google Colab

Follow these steps to start working in the Google Colab environment.

Upload file to your Google Drive

Create a new folder in your Drive (My Drive) and name it 'Colab Notebooks'.

In this folder create a folder named 'Mentorship'

Go to the folder and upload the **notebook** file given to you

Google Colab

Go to https://colab.research.google.com/

You will get a pop-up to open a file. Go to the folder where you have uploaded the **notebook** file.

This will open the Google Colab environment. From here follow the initial steps for set-up and then go through the exercises.

You have to run each cell, one by one. You can do this by clicking on the 'Play' button in front of the coding cell.

At the end of the examples the exercise questions are given. Below that several empty coding cells are already created. Add each answer to a question in a separate code block.
